

Looking for human tumour samples?

Have a look at the Belgian Virtual Tumourbank - catalogue !

The Belgian Virtual Tumourbank (BVT) project consists of a network of eleven Belgian university hospitals. To facilitate the search for tumour samples scattered among different institutions, one central database collects data from residual material of human tumours. This data is made available to researchers via the Belgian Virtual Tumourbank catalogue (BVTc). The BVTc contains general, patient, medical and technical data.

Access to the BVT Catalogue (BVTc)

Quick search for sample availability

WHO

Belgian researchers of non-profit research organisations.

WHO

Any researcher active in the broad field of oncology (both from non-profit and profit organisations).

WHAT

Full access to the BVTc, to obtain detailed sample level information.

WHAT

Easily verify the number of samples of interest registered in the BVTc and the contact info of the local biobanks hosting these samples.

HOW

Go to www.virtualtumourbank.be
 >> catalogue of biobanked samples
 >> access to the catalogue
 → Fill in the catalogue application form
 → Send (with requested attachments) to biobank@kankerregister.org.

HOW

Go to www.virtualtumourbank.be
 >> catalogue of biobanked samples
 >> sample availability request form
 → Complete the form and click on "send".
