## Note on interpretation of results

**Results and conclusions reported are limited to the PROCARE patient group registered.**

**Results and conclusions can not be generalised to the general population of Belgian rectal cancer patients.**

## **1.5. Adjusted relative survival**

Adjustment of relative survival for age, cStage, gender and radical resection was not possible for the complete patient group. Adjustment was obtained for the patient group that underwent radical resection, see further.

## 2. Only patients with radical resection
