

De Gleasonscore van de prostaat

De differentiatiegraad bij de prostaat, uitgaande van de Gleason-score, is gewijzigd in de TNM 7de editie 2de druk.

Hieronder vindt u de correctie zoals ze ons is toegestuurd door prof. Wittekind van de UICC.

G Histopathological Grading

- G1 Well differentiated (slight anaplasia) (Gleason 2 - 6)
- G2 Moderately differentiated (moderate anaplasia) (Gleason 7)
- G3-4 Poorly differentiated/undifferentiated (marked anaplasia) (Gleason 8 - 10)

These Gleason equivalents differ from those in the first UICC TNM printing.

Prognostic Grouping - Prostate (*nvdr: onder voorbehoud*)

Group I	T1a-c	N0	M0	PSA < 10	Gleason < 6
	T2a	N0	M0	PSA < 10	Gleason < 6
Group IIA	T1a-c	N0	M0	PSA < 20	Gleason 7
	T1a-c	N0	M0	PSA > 10 < 20	Gleason < 6
	T2a	N0	M0	PSA > 10 < 20	Gleason < 6
	T2a	N0	M0	PSA < 20	Gleason < 7
	T2b	N0	M0	PSA < 20	Gleason < 7
Group IIB	T2c	N0	M0	Any PSA	Any Gleason
	T1-2	N0	M0	PSA > 20	Any Gleason
	T1-2	N0	M0	Any PSA	Gleason > 8
Group III	T3a, b	N0	M0	Any PSA	Any Gleason
Group IV	T4	N0	M0	Any PSA	Any Gleason
	Any T	N1	M0	Any PSA	Any Gleason
	Any T	Any N	M1	Any PSA	Any Gleason

Note

When either PSA or Gleason is not available, grouping should be determined by T category and whichever of either PSA or Gleason is available. When neither is available Prognostic Grouping is not possible, use Stage Grouping

The Prognostic Grouping of Group IIA (presented here) has been corrected since the first printing of TNM 7th ed.
